

Intermiel

THE WORLD OF BEES, A WORLD TO DISCOVER

Presentation

Established since 1976 in Mirabel (Saint-Benoit), Intermiel is a major apiarian farm which manages the production of approximately 2 000 bee-hives.

By its established facilities, the enterprise reflects all aspects of a genuine beekeeping farming, where one of its speciality is hydromel (honey wine) production. At all times, the general public has access to the gift shop, the exhibition rooms and the production facilities.

Since 1991, with new developed structures, Intermiel has opened an educational section relating to the knowledge of the world of bees and the work of the bee-keeper.
