

PRESENTATION OF THE FIRM

Established since 1976 in Mirabel, (Saint-Benoît), Intermiel is an important apiarian farm managing the production of approximately 3000 beehives.

By its established facilities, the company reflects all aspects of a genuine bee farm, specializing in mead (honey wine) production. At all times, the general public has access to the gift shop, the exhibition rooms and the production facilities.

Since 1991, with new developed structures, Intermiel has opened an educational centre relating to the knowledge of the world of bees and the work of the beekeeper.

THE ACADEMIC PROGRAM

A truly "avant-gardiste" concept was designed and experimented by highly qualified teachers. Under many diversified aspects, the instructive approach combines observation, manipulation and game playing activities. This program is particularly adapted for pre-school, kindergarten and elementary students.

The workshops are adapted according to the student's age; the puppet theatre workshop is available for the youngest and involves gesture playing.
